Ondax's LM Series Compact Single Frequency Laser Module incorporates the Ondax SureLock™ VHG-stabilized laser diode to deliver steady, single frequency performance in an ultra-compact footprint. Offering both computer and integrated user controls, the LM Series includes precision temperature and current controls to deliver better than 1m coherence length and 1% power stability with less than 1 minute warm-up. This tightly integrated package makes it the ideal choice for both OEM instrumentation and laboratory applications.

The LM Module is available in wavelengths from 405nm to 808nm.
